Status of Inland AIS in Ukraine

- The presented structure of RIS/AIS along Danube is a new project which contains a description of the basic points and minimal necessary equipment

- The system consists of 7 positions, the average distance between them is about 22,5 km.,

4 of 7 sites are at the core, 3 of which are designed on the basis of ready-made VTS sites: Reni, Izmail, Vilkovo. The remaining 3 positions are remote and contain mostly BS AIS. Only one point on the dam (0 km.) assumes as automatic remote radar site
