

INeS Danube Austria

What is INeS Danube Austria?

INeS Danube Austria is an e-learning platform open to all interested at www.ines-danube.info. It provides a modern form of education in the field of logistics on inland waterways in the Danube region with particular reference to intermodality. The platform caters to the needs of different target groups, whether pupils or students of educational institutions focusing on logistics, practitioners like shipping companies or the manufacturing industry. Other INeS e-learning platforms focusing on other European regions can be found on www.ines.info.

What can INeS Danube Austria do for you?

INeS Danube Austria provides content for the specific learning levels of its users.

- The **basic course** contains general information about intermodal inland waterway transport and focuses specifically on users new to this field.
 - **Target groups** such as ports, manufacturing industry and shipping companies find a selection of content relevant to their profession.
- Specific information can be accessed by clicking on a **topic list**.
 - Educational institutions and experts, who wish to create individual courses, can do so within specific **learning groups**.
