

INFORMATION AND TRAINING CENTRE Infocenter Danube

The information and training centre **Infocenter Danube** is situated on the 5th floor of the logistic center Ennshafen OÖ GmbH. It is an Information and Interaction area and is used as integrated part of the visitor's concept of Ennshafen, where you can also book guided tours around the port area by bus or ship. Additionally you can visit a cargo handling company (registration is required in advance) as well as an exhibition vessel MS Franz Liszt. The multifunctional area consists of a multimedia event area, an interactive training area, and a 3D cinema, which can be used for thematic events, workshops, symposia, round tables or educational excursions.

Infocenter Danube is mainly aimed at:

- providing information about multimodal transport logistics with focus on the promotion of Inland Navigation.
- lobbying activities in the field of logistics with focus on better integration of Inland Navigation
- acting as a connecting link between relevant educational institutions, business sector and authorities dealing with multimodal transport logistics, employers and potential job aspirants so as to achieve actual liaison between the education system and the labour market.

Infocenter Danube offers visitors an insight into all Danube related activities (transport, port operations, navigation, jobs etc.) as well as the possibility to experience different logistic tasks in interactive PC games, such as building futuristic vessels (3D cinema), or handling trimodal cargo on a container terminal or RoRo ramp.

Infocenter Danube addresses educational institutions, port and transport operators, IWT professional associations and organizations, politics.

Within the HINT-Project a logistics simulator for trimodal container handling and IWT job promotion videos will be produced and implemented.
